PROFILE

Information Technology and Digital Business Engineering student at Universidad Anáhuac Mayab and freelance full-stack developer. I build end-to-end web applications with **React / Next.js, TypeScript, Node.js and Python**: I have shipped corporate websites, an online store and an inventory system to production for clients in Mexico, the United States and Spain. I am comfortable with **third-party API integration, databases and AI applied to product**.

SKILLS

FRONT-END DEVELOPMENT | React • Next.js • TypeScript • JavaScript • Tailwind CSS • HTML5 / CSS3 • GSAP

BACK-END DEVELOPMENT | Node.js • Express • REST APIs • OAuth 2.0 / JWT • Python • Java

DATABASES | PostgreSQL • MySQL • MongoDB • Supabase • Firebase • SQL

ARTIFICIAL INTELLIGENCE | LLM API integration in product • AI-assisted development (Claude Code) • Structured prompting and response parsing

TOOLS | Git • GitHub • Vercel • Vite • Figma • Linux • Agile methodologies

SOFT SKILLS | Teamwork • Problem solving • Autonomy • Adaptability

EXPERIENCE

FULL-STACK DEVELOPER | Freelance

Remote • Clients in Mexico, the United States and Spain | 2024 – Present

- **ABA Cargo** (international logistics, Mexico–USA–Canada): corporate site in Next.js with a shipping quote calculator and a **conversational assistant I built by connecting an LLM API**.
- **Herbolario in Madrid: custom inventory system** — stock control, product creation and reports — with React/Next.js, a database and Python scripts for data import and cleanup.
- **2 Garzas** (Cancún): **online store on Shopify** — theme customisation, catalogue and filters, payment method setup and Instagram integration.
- **RenalStar Peninsular**: institutional website for a haemodialysis centre, with **UX/UI design** and development in my charge.

End-to-end work: interface design, API integration, data modelling and CI/CD deployment.

RELATABLE | Brand Ambassador

Remote, Mexico | February 2020 – July 2023

- Led the content strategy for the brand's entry into the Mexican market, working autonomously from the age of 16.
- TikTok and Instagram campaigns that exceeded **1 million accumulated views**.

PROJECTS

[PrivScore](#) | [Browser extension that rates website privacy](#)

Academic team project — Universidad Francisco de Vitoria, Madrid • JavaScript • Chrome Extensions API (Manifest V3) • Gemini API

- Extension for **Chrome and Edge (Manifest V3)** that analyses the active site and returns an **A–E rating**: classifies cookies (persistent, third-party, by category), detects third-party scripts and *iframes*, and downloads the privacy policy to analyse it.
- Integration of the **Gemini API** scoped to extracting signals from the legal text; **the score is computed by a deterministic algorithm** of four weighted sections, so the result is reproducible and auditable rather than dependent on the model.
- **My contribution**: the extension's *service worker*, cookie classification, the *scoring* engine and the entire AI layer. The companion web application was developed by other team members.

[Personal portfolio](#) | [Full-stack web application](#)

Next.js 15 (App Router) • TypeScript • Tailwind CSS • GSAP • Vercel

- Integration of the **Spotify API (OAuth 2.0 + refresh token)** in server-side API Routes so credentials are never exposed to the client.
- Performance optimisation (*lazy loading*, dynamic imports, WebP images, SSR/SSG) and animated interface with **GSAP and Framer Motion**.

EDUCATION

ANÁHUAC MAYAB

Information Technology and Digital Business Engineering

August 2023 | May 2028
Mexico, Yucatán

FRANCISCO DE VITORIA (UFV)

Academic exchange — artificial intelligence and cybersecurity

September 2025 | May 2026
Spain, Madrid

HONORS & AWARDS

Binary & Quantum Challenge

3rd place in programming contest | Anáhuac Mayab | Mar. 2025 | Mexico, Yucatán

UCHALLENGE XI, XII, XIII

Marathon where students, coaches and experts come together in a space of collaboration and creativity | Anáhuac Mayab

AMIGOS POR SIEMPRE

Volunteer participation | Soñar Despierto A.C. | May 2024 | Mexico, Yucatán

COURSES

AI and Machine Learning in Java — Oracle Academy, 2025 (60 h)

Cisco Networking Academy — Cisco, 2024

Python Programming — Google, 2024

Data Structures in Python — PUC Chile, 2024

Object-Oriented Programming in Java — UC San Diego, 2024

LANGUAGES

Spanish (native) • English (advanced)

INTERESTS

Cinematography • Piano • Travel
